DETAILED ACTION

1. Claims 21-23, 27-35 and 37-55 are pending as amended on 19 July 2006.

Claims 1-20, 24, 25 and 36 have been cancelled; claims 21, 23, 27, 29, 33 and 34 were amended and claims 37-55 were added.

Election of Species

I

2. This application as amended contains claims directed to the following patentably distinct species:

- a. A wellbore fluid comprising an ionic water-soluble hydrophobically modified polymer—claims 21-23, 27-35 and 37-40.
- b. A wellbore fluid comprising a non-ionic water-soluble hydrophobically modified polymer, substantially free of a surfactant—claims 41-48.
- c. A wellbore fluid comprising a non-ionic water-soluble hydrophobically modified polymer and an ionic surfactant—claims 49-55.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

la

3. Should applicant elect species 'a' above, claim 38 is generic to the following disclosed patentably distinct species: the ionic water-soluble hydrophobically modified polymer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

lb

4. Should applicant elect species 'b' above, claims 42 and 45 are generic to the following disclosed patentably distinct species: the non-ionic water-soluble hydrophobically modified polymer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

lc

5. Should applicant elect species 'c' above, claim 50 is generic to the following disclosed patentably distinct species: the non-ionic water-soluble hydrophobically

modified polymer; and claim 51 is generic to the following disclosed patentably distinct species: the ionic surfactant.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of each, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. See MPEP § 809.02(a).

6. Applicant is advised that the reply to this requirement to be complete must include

- (i) an election of the species to be examined even though the requirement be traversed (37 CFR 1.143) and
- (ii) identification of the claims encompassing the elected invention.

The election of the species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly

and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
